| Address: | E-mail: |
| Map coordinates: | Issued by: |
| Owner/arranger: | Date: |

Inside this stable, the farrier may carry out WARMING under these conditions:

- Location of the hotline: _____
- The court butcher has a certificate for fire hazard work.
- The floor is non-combustible with a minimum width of 2.5 metres.
- 2 metres in front of and behind the horse and the road to the car are clean and horse blankets, straw bales, hay bags and other combustible material are removed.
- Box doors at the site are kept closed during the horse coning.
- Wall connects to floor without major gaps
- Welding or grinding that causes sparks is not carried out in the stable.
- In addition to the fire extinguisher in the farrier's car, there is another fire extinguisher readily available.
- If nothing unusual has occurred, no aftercare is required

If the above can NOT be met, the farrier must obtain a permit issued by the permit manager for fire hazard work. Contact:

Name: _____ **Tel no:** _____
